Leasing / Financing Options Available

Our Heavy Duty hard drive shredders are the best value in the industry. These machines are direct driven so there is no belt that can ever break and need to be replaced resulting in downtime and additional maintenance cost.

All of our HD shredders are manufactured with a powder coated finish which offers greater durability and corrosion resistance than a traditional painted finish. Our cutters are manufactured from the same material jack hammer bits are, making them extremely durable and exceptionally long lasting.

HD shredders are capable of shredding most standard hard drives up to 1" thick, in addition to backup tapes, DVD's, cell phones and assorted e-waste. The HDs are designed for stationary applications or to be installed in trucks for mobile hard drive shredding.

SPECIFICATIONS	HD300 .75" Shred Width
Power Requirements In Voltage	208, 230, 460
Motor Output In HP	3
Infeed Width In Inches	5/2
Shred Width in Inches	.75
